maximizing wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014
the chart shows the main sources of returns and values
and their percentage of the total returns

Approximate Total Returns NS

Cost of natural resource conflicts in 2014
estimates are based on average national values

Estimated human wildlife conflict cost NS 301,310
Estimated poached high value species loss NS 0
Total conflict cost estimate NS 301,310

Natural resource cost–return ratio in 2014
the chart shows the approximate ratio of returns to costs

Management performance in 2015

Category Performance
1 Adequate staffing
2 Adequate expenditure
3 Audit attendance
4 NR management plan
5 Zonation
6 Leadership
7 Display of material
8 Event Book modules
9 Event Book quality
10 Compliance
11 Game census
12 Reporting & adaptive management
13 Law enforcement
14 Human Wildlife Conflict
15 Harassing management
16 Sources of NR income
17 Benefits produced
18 Resource trends
19 Resource targets

Wildlife status summary in 2015

Human wildlife conflict

Most troublesome problem animals 2013-2015
the chart shows the number of incidents per species for the last 3 years;
the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2013-2015
the chart shows the number of incidents per category for the last 3 years;
the darkest bar (on the right) indicates the current year for each type

Wildlife removals – quota use and value

Wildlife status summary in 2015

Key to the status barometer
Wildlife status
extinct very rare rare uncommon common abundant
weak/bad reasonable good

Success/threat flags
success/ benefit created weakness/ action needed

Conservancies reduce environmental costs
while increasing environmental returns.
Returns from wildlife can far outweigh
human wildlife conflict costs.

### Wildlife Status

- **Count trend** – gives the species status in the conservancy based on game count trend data.
- **National guideline** – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.
- **Desired number** – gives the species status in the conservancy based on what the conservancy would like to have.

#### Sightings indicator

- Dark green (abundant) – there should be less;
- Light green (common) – the desired number is reached;
- Yellow (uncommon) – there should be more;
- Light orange (rare) – there should be more than double;
- Dark orange (very rare) – there should be more than triple;
- Red (extinct) – the species needs to be reintroduced.

### Locally rare species

- Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

### Wildlife introductions

- Duiker
- Elephant
- Gemsbok
- Giraffe
- Jackal
- Klipspringer
- Kudu
- Mtn. zebra
- Ostrich
- Springbok

### Wildlife mortalities

- Duiker
- Jackal
- Steenbok
- Other

### Annual rainfall

- Year with no rain show gaps in data collection

### Predator monitoring

- Charts show the average number of animals seen per Event Book each year
- Status barometers reflect the general sightings trend over the last 5 years

### Annual game count

- Currently not done

### Wildlife provides a wide range of benefits.

Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

### By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.
Enabling wise conservancy governance...

Conservancy statistics

- Date Registered: March 2009
- Members: 149
- Size (square kilometres): 6625

Conservancy Governance

- Number of management committee members: 11
- Date of last AGM: Sat, February 27, 2016
- Attendance at AGM: Men: ; Women: 
- Date of next AGM:

Other important issues

- Financial report approved?
- Budget approved?
- Work plan approved?

Employment

- Conservancy staff: Male 12
  Female 7
- Community game guards: 8
- Community resource monitors: 0
- Lodge staff: Male 0
  Female 0

Benefits

- Meat Distribution

Conservancy Self Evaluation  How well does the conservancy consider it has performed in the past year?
