maximising wildlife returns by minimising threats...

### Consistency status summary

**Returns from natural resources in 2014**
The chart shows the main sources of returns and values and their percentage of the total returns.

- **Approximate Total Returns:** NS

**Cost of natural resource conflicts in 2014**
Estimates are based on average national values.

- Estimated human wildlife conflict cost: NS 23,630
- Estimated poached high value species loss: NS 0
- Total conflict cost estimate: NS 23,630

**Natural resource cost–return ratio in 2014**
The chart shows the approximate ratio of returns to costs.

- Returns data not available at time of printing.

### Human wildlife conflict

**Most troublesome problem animals 2013-2015**
The chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species.

- The most troublesome species in 2015 are on the left.
- The least troublesome species in 2015 are on the right.

**Type of damage by problem animals 2013-2015**
The chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type.

### Poaching

**Number of incidents per year**
Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category.

- Firearms recovered
- Traps/snares recovered

**Arrests and convictions**
Number of incidents per category.

- Arrests
- Convictions

### Wildlife removals – quota use and value

**Species**

</tbody>
</table>

**Potential value estimates (NS) for species are based on:**
- **Potential trophy value** - the average trophy value for that species in the conservancy landscape
- **Potential other use value** - the average most value for common species.

Potential trophy value of high value species (indicated with an *) are never used for meat.

### Key to the status barometer

- **Wildlife status:**
  - **extinct**
  - **very rare**
  - **rare**
  - **uncommon**
  - **common**
  - **abundant**
  - **weak/bad**
  - **reasonable**
  - **good**

- **Management performance & other data:**

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.
Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Constitutional adherence

- Approved constitution: ✔
- AGM held: ✔
- Management and utilisation plan: ✗
- Financial annual report approved at AGM: ✗
- Financial report external review: ✗
- Benefit distribution plan: ✗

Conservancy Governance

- Number of management committee members: 15
- Date of last AGM: Thu, October 29, 2015
- Attendance at AGM: Men: 65; Women: 50
- Date of next AGM: Thu, November 24, 2016

Other important issues

- Financial report approved?: ✔
- Budget approved?: ✗
- Work plan approved?: ✔

Employment

- Conservancy staff: Male 9, Female 1
- Community game guards: 9
- Community resource monitors: 0
- Lodge staff: Male 0, Female 0

Benefits

- Conservancy staff: Male 9, Female 1

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?
