Prerequisites to harvesting

32. (1) No person shall in Namibia or in Namibian waters harvest any marine resource for commercial purposes, except under a light, an exploratory right or a fisheries agreement.

(2) In the case of a marine resource which has been made subject to a quota, no person shall in Namibia or in Namibian waters harvest such a resource for commercial purposes, except in terms of a quota or of permitted by-catch under a right, an exploratory right or a fisheries agreement.

(3) No person shall in Namibian waters use any vessel to harvest any marine resource for commercial purposes, except in terms of a licence issued under section 40.

(4) No person shall use a Namibian flag vessel to harvest any marine resource in any waters outside of Namibian waters, except in terms of a licence issued under section 40.

(5) Where Namibia is authorized by any international agreement to grant a right or exploratory right, or to allocate a quota, in respect of harvesting marine resources outside Namibian waters, no person shall use a Namibian flag vessel to harvest any marine resource to which the agreement applies, except in terms of a right granted under section 33, an exploratory right granted under section 34 or a quota allocated under section 39, as applicable.

(6) The issue and validity of a right, an exploratory right or a quota required under subsection (5), and the manner of its suspension or cancellation or limitation, shall be subject to the terms of the agreement referred to in that subsection.

Right to harvest marine resources

33. (1) The Minister may from time to time, by notice in the Gazette, announce a period during which applications may be made for rights to harvest for commercial purposes any marine resource, and the conditions on which such marine resource may be harvested, and the Minister shall not consider any application received outside such period.

(2) A person who wishes to apply for a right referred to in subsection (1) shall submit an application to the Minister in the manner prescribed.

(3) The Minister may, subject to subsection (4), grant a right to harvest any marine resource for commercial purposes to any person who applies for such a right under subsection (2), subject to such conditions in addition to those specified in the notice under subsection (1) as may be determined by the Minister.

(4) When considering an application for a right, the Minister may have regard to-

(a) whether or not the applicant is a Namibian citizen;

(b) where the applicant is a company, the extent to which the beneficial control of the company vests in Namibian citizens;
(c) the beneficial ownership of any vessel which will be used by the applicant;

(d) the ability of the applicant to exercise the right in a satisfactory manner;

(e) the advancement of persons in Namibia who have been socially, economically or educationally disadvantaged by discriminatory laws or practices which were enacted or practised before the independence of Namibia;

(f) regional development within Namibia;

(g) co-operation with other countries, especially those in the Southern African Development Community;

(h) the conservation and economic development of marine resources;

(i) whether the applicant has successfully performed under an exploratory right in respect of the resource applied for;

(j) socio-economic concerns;

(k) the contribution of marine resources to food security; and

(l) any other matter that may be prescribed.

A right shall be valid -

(a) for such period as may be prescribed or if no period is prescribed, for such period as the Minister may specify; and

(b) for harvesting the marine resource for which it is granted and for such by catch as may be prescribed or as the Minister may specify.

If at any time before the expiry of a right, the holder of that right has met the prescribed criteria that would have permitted a longer term at the time of granting the right, or no longer fulfils the prescribed criteria for the term that was granted the Minister may vary the period of validity of the right to the period for which the holder qualifies, and when so varying the period, may also vary any condition attaching to the right or impose any additional condition.

Exploratory right to harvest marine resources

34. (1) The Minister may upon application grant to no more than one person at any one time an exploratory right -

(a) to harvest a marine resource in respect of which no right has been granted to any other person so as to allow that person to explore the commercial viability and biological sustainability of that marine resource; or

(b) to harvest a marine resource for which that person has not been granted a right so as to allow that person to research the commercial viability of a method of harvesting not ordinarily used for the harvesting of that particular marine resource in Namibian Waters.
(2) A person who wishes to apply for an exploratory right shall submit an application to the Minister in the manner prescribed, and may do so at any time.

(3) Notwithstanding the provisions of any other law, the Minister may require the applicant to carry out or cause to be carried out such Environmental impact studies, as the Minister may consider necessary for the purposes of this Act.

(4) The Minister may approve the application and grant an exploratory right for such fixed period and subject to such conditions, including permitted by-catch, as may be determined by the Minister, or may refuse the application.

(5) Upon the expiry of an exploratory right, the Minister shall determine whether the resource or method of harvesting is commercially viable and biologically sustainable, and if he or she determines that it is, no further exploratory right may be granted in respect of that resource or method of harvesting.

(6) In the event that the commercial viability and biological sustainability of the resource or method of harvesting is unclear, the Minister may extend the exploratory right once only for a period not exceeding one year or, if the commercial viability, and biological sustainability are unclear due to the poor execution of the exploratory right, a farther exploratory right may be granted to an applicant other than the holder of the original exploratory right.

(7) If before the end of the term of an exploratory right it becomes clear that the resource or method of harvesting is commercially viable and biologically sustainable, the Minister may terminate the exploratory right and announce a period during which applications for rights may be made under section 33(1).

Fisheries agreements

35. (1) The President may enter into a fisheries agreement with a member country of the Southern African Development Community, providing for such country to harvest marine resources in Namibian waters.

(2) A person nominated by the responsible authorities of a party to a fisheries agreement shall be entitled to apply for a quota under section 39 and a licence under section 40 as though he or she were the holder of a right.

(3) Every quota allocated and every licence issued to a person entitled under subsection (2) shall be subject to such quantitative or other limits which a fisheries agreement may specify as well as to all other provisions of this Act.

Measures and quotas

39. (1) The Minister may, by notice in the Gazette, subject the harvesting of any marine resource to such measures as he or she may consider necessary, and which may include quotas.

(4) Where it is appropriate not to allocate quotas to individual holders of a right, the Minister may allocate a quota under subsection (3) to a group of holders of a right to harvest the resource in question.

(5) The Minister shall cause every applicant for a quota to be notified in writing of his or her decision on the application.

(6) The aggregate of quotas allocated under subsection (3) in respect of any marine resource shall not exceed the total allowable catch set for that resource.

(2) A licence to use a fishing vessel to harvest a marine resource shall only be valid if the licensee holds a right or an exploratory right for that resource, and if a quota has been allocated, holds a quota for that resource.

(3) The Minister may, upon application by a person referred to in subsection (1), issue a licence to that person in respect of a fishing vessel, authorising such activities, subject to such conditions and valid for such period, as the Minister may determine and state in the licence.

(e) the approval might threaten the sustainability of a particular marine resource.

(5) If-

(a) any change has occurred in the information submitted by a licensee in connection with the application referred to in subsection (1); or

(b) the vessel for which the licence has been issued ceases to be used as a fishing vessel,

(5) Notwithstanding subsections (1), (2) and (3), where a licensee has committed one of the actions contemplated by subsection (1) or is convicted of an offence under this Act, the Minister may, by giving due notice by such means as may appear most effective in the circumstances, suspend the validity of the licence in respect of harvesting any marine resource outside Namibian waters, for such period as the Minister considers fit.

Transfer of rights, exploratory rights, quotas and licences

42. (1) No right or exploratory right may be transferred to another person except with the approval of, and subject to the conditions determined by, the Minister, but such approval may only be granted if the quota, if any, or a portion thereof, connected with the right or exploratory right is also transferred to the same person.
