Environmental Impact Assessment (EIA) for the Orange River Mines
Life of Mine (ORM LOM) Extension Project

Invitation to Participate

Namdeb Diamond Corporation (Namdeb) holds the Orange River Mining Licence along the north bank of the Orange River.

At present, mining is limited to Daberas, about 12 km south west of Sendelingsdrif, which is about 20 km south of Rosh Pinah. Sendelingsdrif represents the second largest deposit after Daberas. Namdeb is considering adding the Sendelingsdrif deposit to the current mine plan to extend the life of mine along the Orange River, as a means of meeting its objective of maximum sustainability when the current mining licence expires in 2020.

CSIR and Enviro Dynamics have been appointed to prepare an EIA and environmental management plan for activities associated with the ORM LOM extension project. This study will serve as an amendment to the current EIA for the area.

The EIA process includes consultation with stakeholders. We therefore invite all stakeholders and interested parties to:

- Register with the contact below as a stakeholder to receive and respond to all correspondence distributed about the EIA amendment process.
- Attend the public consultation meetings to be held in Oranjemund and Rosh Pinah.

Public meetings:

Rosh Pinah: Tuesday, 20 April 2010 at 18h00 at the Community Hall
Oranjemund: Wednesday, 21 April 2010 at 18h00 at the School Auditorium

NB: RSVP is required to the below contact address:
Sigi Horstemke – Enviro Dynamics (Pty) Ltd
Tel: (+264 61) 223 336 | Fax: (+264 61) 307 437 | sigi@envirod.com

Script

Citizens of Rosh Pinah and Oranjemund and surrounding areas are invited to attend public participation meetings on the mine extension project planned for Sendelingsdrif.

The following meetings are scheduled:

in Rosh Pinah on Tuesday, 20 April 2010 at 18h00 at the Rosh Pinah Community Hall

and

in Oranjemund on Wednesday, 21 April 2010 at 18h00 at the School Auditorium.

Purpose of these meetings is:

1. to inform residents of the area about the project and its possible influences; and
2. to offer a platform for residents to air their views and concerns, which will be considered during the assessment.

It is very important for all residents to participate in these public meetings.
