maximising wildlife benefits by minimising threats...

Conservancy status

Benefits from natural resources in 2011
-the chart shows the main benefit sources and values and their percentage of the total benefits

Approximate Total Benefits N$ 0

Cost of natural resource conflicts in 2011
-estimates are based on average national values

Estimated human wildlife conflict cost N$ 38,400
Estimated poached high value species loss N$ 0
Total conflict cost estimate N$ 38,400

Natural resource cost–benefit ratio in 2011
-the chart shows the approximate ratio of benefits to costs

Poaching

Number of incidents per year
-Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered
-number of incidents per category

Arrests and convictions
-number of incidents per category

Wildlife status summary in 2012

Wildlife status summary 2012

Wildlife status

Management performance & other data

Key to the status barometer

Conservancies reduce environmental costs while increasing environmental benefits. Benefits from wildlife can far outweigh human wildlife conflict costs.
Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.
